FRIDAY MAY 15, 2020

09.00 - 11.30 SESSION 1

- 09.00 - 09.15 Transcatheter aortic valve replacement: Update on clinical trials. What have we learned? What do we anticipate to learn?
- 09.15 - 09.30 Landscape of TAVR in Greece: An overview of current adoption and utilization. Challenges, outcomes and prospects.
- 09.30 - 09.45 Low to intermediate risk patient selection for TAVR in the year 2020: I wish I had chosen SAVR in this patient!
- 09.45 - 10.00 Low to intermediate risk patient selection for SAVR in the year 2020: I wish I had chosen TAVR in this patient!
- 10.00 - 10.15 SAVR in the year 2000. Bussiness as usual? Not really!
- 10.15 - 10.30 Discussion/Questions
- 10.30 - 11.30 Live in a Box

11.30 - 11.45 Welcome Notes

11.45 - 12.00 Coffee break

12.00 - 14.00 SESSION 2

Bicuspid Aortic Valve debate

- 12.00 - 12.15 Bicuspid aortic valve: Considerations for successful TAVR. An Interventionalist's point of view.
- 12.15 - 12.30 Bicuspid aortic valve: Surgery should remain first option. A surgeon's point of view.

Cerebral embolic protection debate

- 12.30 - 12.45 Stroke after TAVR. Prevalence trends and prevention by planning procedure techniques/steps and device/hardware selection.
- 12.45 - 13.00 Cerebral embolic protection for all! The data is out there.
- 13.00 - 13.15 Cerebral embolic protection rarely if ever used! The data is weak and does not merit the additional procedural steps and costs!
- 13.15 - 13.30 Discussion/Questions
- 13.30 - 14.00 Live in a Box

14.00 - 14.30 Lunch break

14.30 - 16.30 SESSION 3

- 14.30 - 14.45 Rhythm disturbances post TAVR: Incidence, predictors and outcomes. Has any progress been made?
- 14.45 - 15.00 Need for pacemaker after TAVR. Borderline decisions only!
- 15.00 - 15.15 Paravalvular regurgitation post TAVR: A thing of the past, or an ongoing consideration?
- 15.15 - 15.30 Coronary protection: techniques and device selection in TAVR.
- 15.30 - 15.45 Coronary interventions post TAVR: Difficulties and challenges with current valve designs in the era of TAVR for low risk patients.
- 15.45 - 16.00 Discussion/Questions
- 16.00 - 16.30 Live in a box

16.30 - 18.30 SESSION 4

- 16.30 - 16.45 Minimalist TAVR and early discharge: Are we there yet?
- 16.45 - 17.00 Update on Edwards TAVR designs and future developments.
- 17.00 - 17.15 Update on Medtronic TAVR designs and future developments.
- 17.15 - 17.30 Update on Boston Scientific TAVR designs and future developments.
- 17.30 - 17.45 Update on Abbott TAVR designs and future developments.
- 17.45 - 18.00 Discussion /Questions
- 18.00 - 18.30 Live in a box

18.30 - 18.45 Coffee and snack break

18.45 - 20.30 SESSION 5

- 18.45 - 19.00 Subclinical bioprosthetic valve thrombosis and structural valve failure: How to identify, how to manage?
- 19.00 - 19.15 Extremely calcified aortic valve complex: How to best implant a Transcatheter valve with optimal outcomes?
- 19.15 - 19.30 Vascular access and eliminating vascular complications: Temporal trends, device/hardware selection and techniques to achieve the optimal.
- 19.30 - 19.45 TAVR alternative access in 2020.
- 19.45 - 20.00 Discussion / Questions
- 20.00 - 20.30 Live in a box

SATURDAY MAY 16, 2020

09.00 - 11.15 SESSION 6

- 09.00 - 09.15 TAVR for native aortic regurgitation: The last frontier in aortic valve disease?
- 09.15 - 09.30 Prosthesis selection in low risk TAVR patients: Should some valves be preferred over others?
- 09.30 - 09.45 Role for TAVR in moderate aortic stenosis and asymptomatic severe aortic stenosis: Why wait for symptoms?
- 09.45 - 10.00 TAVR in degenerated surgical aortic bio-prostheses: Prosthesis selection, results and the role for Bioprosthetic Valve Fracture.
- 10.00 - 10.15 Studies comparing TAVR valves: What are the meaningful differences in outcomes between valves? "Winner takes all" or individualizing prosthesis selection to the patient?
- 10.15 - 10.30 Discussion / Questions
- 10.30 - 11.00 Live in a box

11.00 - 11.30 Coffee break

11.30 - 13.30 SESSION 7

- 11.30 - 11.45 Transcatheter mitral valve edge-to-edge repair for functional MR: Update on data. What will it take to remove barriers to patient referrals?
- 11.45 - 12.00 Functional mitral regurgitation: Proportionate, disproportionate and implications for treatment.
- 12.00 - 12.15 Degenerative mitral regurgitation: The surgical "state of the art" in the year 2020.
- 12.15 - 12.30 Mitral valve-in-valve and valve-in-ring: Safety, outcomes and future perspectives.
- 12.30 - 12.45 DMR: Edge-to-edge repair indications and limitations.
- 12.40 - 13.00 Discussion / Questions
- 13.00 - 13.30 Live in a box

13.30 - 14.00 Lunch break

14.00-16.00 SESSION 8

- 14.00 - 14.15 Imaging of the tricuspid valve with echocardiography for screening and interventional guidance: Challenges and ways forward.
- 14.15 - 14.30 Imaging of the tricuspid valve with CT and MRI: Insights for the interventional cardiologist.
- 14.30 - 14.45 Transcatheter tricuspid valve repair: Edge-to-Edge in the year 2020.

- 14.45 - 15.00 Transcatheter valve in valve for the right sided valves and Transcatheter tricuspid valve replacement: The landscape in the year 2020.
- 15.00 - 15.15 Surgery for the tricuspid valve: Current state of the art. Reducing the risk and optimizing long term outcomes.
- 15.15 - 15.30 Discussion / Questions
- 15.30 - 16.00 Live in a box
- 16.00 - 18.00 SESSION 9**
- 16.00 - 16.15 Transcatheter Mitral Valve Repair: Update on Mitraclip.
- 16.15 - 16.30 Transcatheter Mitral Valve Repair: Update on Pascal.
- 16.30 - 16.45 Mitraclip and PASCAL devices: Similarities and differences.
- 16.45 - 17.00 Transcatheter Mitral Valve Replacement: An update on devices and how they are finding their way to mainstream application.
- 17.00 - 17.15 Anticoagulation requirements post TAVR, TMVR and TMVr.
- 17.15 - 17.30 Discussion / Questions
- 17.30 - 18.00 Live in a box
- 18.00 - 18.15 Coffee and snack break**
- 18.15 - 20.30 SESSION 10**
- 18.15 - 18.30 Paravalvular leak assessment and interventional management.
- 18.30 - 19.00 Live in a box
- 19.00 - 19.15 Disciplines and Tips for a successful TAVR procedure.
- 19.15 - 19.30 Disciplines and Tips for a successful Mitraclip/Pascal procedure.
- 19.30 - 19.45 TAVR utilization in Greece. Removing the barriers and implementing the current societal guidelines.
- 19.45 - 20.00 Mitraclip/Pascal utilization in Greece. Removing the barriers and implementing the current societal guidelines.
- 20.00 - 20.30 Live in a box
